

Bharath R

Lead Engineering & DevOps Specialist | iOS & Cloud Infrastructure

✉ bharath.naturelover@gmail.com | ☎ [09786061272](tel:09786061272) | 📍 Bangalore, IN

Summary

Lead Engineer with a decade of expertise in mobile ecosystems and cloud-backed architectures. Currently leading the iOS engineering team for globally recognized chess products while supporting Flutter-based development for educational robot applications. Expert in bridging native mobile code with scalable infrastructure, with a proven track record in Containerization, Kubernetes (K8s) orchestration, and Observability for compute-intensive backend systems.

Education

Sona College of Technology	Master in Master of Computer Applications (MCA) • 8.37
Master of Computer Applications (MCA)	January 2011 - December 2014

Experience

Miko	October 2023 - Present
-------------	------------------------

Lead iOS Developer (Chess Ecosystem) & Flutter Development Support

- Mobile Leadership: Overseeing the iOS engineering team for the Square Off and MikoChess applications, leading feature expansion, architectural maintenance, and ecosystem stability.
- Flutter Development: Supporting the ongoing development and feature enhancement of the Miko Parent and Miko Companion applications, ensuring seamless user interaction with AI-powered robots.
- Infrastructure Management: Managing the maintenance and scaling of the containerized backend infrastructure for the chess ecosystem, ensuring high availability of Kubernetes-hosted services.
- Observability: Implementing monitoring and logging strategies for the chess analysis backend to track engine health, performance metrics, and evaluation stability.

Infvention Technologies (Acquired by Miko)	November 2018 - October 2023
---	------------------------------

Lead iOS Developer

Project: Square Off Chess & MyChessApps

- Containerization Implementation: Spearheaded the migration of resource-heavy chess engines (Stockfish/Lc0) into Docker containers, optimizing engine execution by moving intensive computation from local devices to the cloud.
- Kubernetes Orchestration: Orchestrated the deployment of chess analysis microservices using Kubernetes (K8s), implementing pod scaling to handle global traffic spikes and real-time AI evaluation requests.
- Full-Stack Engineering: Developed native iOS applications while building the communication bridge between Swift/Objective-C layers and the K8s-hosted engine API via the UCI protocol.
- R&D Leadership: Driven R&D initiatives for robotic hardware communication and represented the product at global investor events and technology showcases.

Mallow Technologies	May 2015 - November 2018
----------------------------	--------------------------

Senior iOS Developer

- RedTaxi (Cab Booking & Tracking): Managed the end-to-end development of a high-traffic cab booking platform, implementing real-time tracking, geo-location services, and route optimization using Google Maps API and Socket.io.
- Controllex & Continue Care: Developed a universal remote app for global appliance control via AWS IoT and managed project lifecycles for healthcare-focused iPad applications using MQTT for real-time data sync.

Skills

★ DevOps & Infrastructure

Containerization (Docker), Kubernetes (K8s), Observability & Monitoring

★ Programming & Mobile

Swift, Objective-C, Flutter (Dart), Python, iOS Architecture Design

★ IoT & Networking

AWS IoT, Core Bluetooth (BLE), MQTT, Firebase

★ Tools

GIT, CI/CD Automation, In-App Purchases, Core Location & Geo-fencing

Languages

English

Tamil

Interests

★ Badminton

★ Gaming

★ Driving
